ENVIRONMENTAL DOCUMENTATION SOFTWARE

NEMS Chemicals is a market leading database and web application tool used by the oil and chemical industries for documenting, evaluating and reporting chemicals' environmental properties.

QUALITY

Ensure correct environmental Quality Assurance of chemicals within regulatory requirements.

ACCESS

Over 3000 chemical products from 140 suppliers.

SECURE

ISO27001 Certified.

ACCESSIBLE

Ready to use Web Based SaaS Solution.

AUTOMATED

Reduce cost and risk with automated processes.

INDUSTRY STANDARD

NEMS Chemicals supports the HOCNF* format for ecotoxicological documentation of offshore chemicals.

Supplier, operator and authorities have access to the same data.

Automatic check of HOCNF consistency and calculation of environment colour (Green, Yellow, Red, Black)

DATA CONTROL

NEMS Chemicals simplifies and reduces work related to preparing discharge applications and reports.

Environment colour calculation, based on the OSPAR pre-screening scheme fine-tuned to national regulations.

The chemical supplier owning the data enters data into the database and opens access to O&G Operator.

TRANSPARENT

Supplier, operator and authorities have access to the same data – improves communication between the different stakeholders.

Automatic data transfer to NEMS Accounter

* Harmonized Offshore Chemical Notification Format
